

Borlänge Steel Rolling Mill

Product: Hydrotech Discfilter
Model: 4 x HSF3112-2F
Client: SSAB Tunnbrät AB
Max Flow: 5200 l/sec
Completion: Early 2008

Project

The contract for Borlänge Steel Rolling Mill was for the supply and installation of a new water intake plant as part of an upgrade by SSAB Tunnbrät AB to their Steel Rolling Mill at Borlänge, Sweden. Four 3,1 m diameter Hydrotech Discfilters fitted with 100 μm filter elements were supplied and installed to treat 5200 l/sec of intake water from the local lake.

Hydrotech were responsible for the installation and commissioning with others responsible for the civil design and construction.
