

## Norske Skog Saugbrugs Paper Mill

Product: Hydrotech Drumfilter  
Model: 6 x HDF2408-2F  
Client: Norske Skog  
Max Flow: 3000 l/sec  
Completion: 2004

### Project

The contract for Saugbrugs Paper Mill was for the supply and installation of a new water intake plant as part of a €500,000 (NOK 4.0m) upgrade by Norske Skog to their PM6 (paper machine 6) at Saugbrugs Paper Mill, Halden Norway. Six 2,4 m diameter Hydrotech Drumfilters fitted with 30 µm filter elements were supplied and installed to treat 3000 l/sec of intake water from the local lake. The PM6 facility produces 300,000 tonnes per year of Supercalendered (SC) Magazine Paper.

Hydrotech's local agent, Sterner, were responsible for the installation and commissioning with others responsible for the civil design and construction.
